Industrial Supply Products

Model # RZ-WP-XXW-750

LED full-size wall packs project a bright, clean light and reach full brightness instantly. They use LED lamps, which last longer and use significantly less energy than wall packs with other lamp types, such as high-pressure sodium or compact fluorescent. They also produce very little heat and can withstand temperature changes and humidity. These wall-mounted outdoor lighting fixtures are commonly used to replace traditional lighting wall packs on commercial and industrial buildings.
